

Pretty Picks â WhatsApp Order Flow Guide

Audience: Team members who manage orders and respond to customers.

Purpose: Explain how WhatsApp ordering works from browsing to fulfillment.

1) What customers see on the website

- Customers browse products on the website.
- Each product has a â WhatsApp Orderâ button.
- When they tap the button, WhatsApp opens with a pre-filled message.

2) What the pre-filled message includes

- Product name
- Product price
- Product link
- Any selected details (if the customer chose options)

3) How the order starts (Customer flow)

1. Customer visits the product page.
2. Taps â WhatsApp Orderâ .
3. WhatsApp opens with a message already written.
4. Customer sends the message to Pretty Picks on WhatsApp.

4) How you receive the order (Admin flow)

1. You receive a WhatsApp message from the customer.
2. The message includes the product and link.
3. You confirm availability, price, and delivery details.
4. You finalize payment and delivery address in WhatsApp.

5) What to do after receiving the message

- Reply quickly: confirm the product is available.
- Ask for missing details:
 - Full name
 - Shipping address
 - Pincode
 - Phone number
- Confirm the final price (including delivery charges if any).
- Share payment details and confirm payment method.
- After payment, confirm expected delivery date.

6) Common customer questions (suggested replies)

- â Is it available?â â Yes, itâ s available. Would you like to place the order?â
- â Any discount?â â We currently have our best price listed on the website.â
- â When will it be delivered?â â We usually deliver within Xâ Y days after confirmation.â
- â Can I change color/size?â â Please share the preferred variant; Iâ ll confirm availability.â

7) Tips for smooth order handling

- Always confirm the product name and price in your reply.
- Send a short order summary before asking for payment.
- Keep all customer details in one place for easy tracking.
- If a product is out of stock, suggest similar alternatives.
